Mrs. Cassie Sanford

TROY Alumna of the Year Cassie Sanford acknowledges her education at Troy University as being the basis for her work-related accomplishments.

"I credit TROY for the foundation of the success in my professional career," Sanford said.

Sanford who graduated with a bachelor's degree in print journalism and public relations is currently the vice president of marketing and development for Habitat for Humanity of Greater Birmingham.

Throughout her career, Sanford has accomplished much that many young professionals only dream about. Global missions have taken her to Iquitos, Peru, and Siguatepeque, Honduras. Also, in 2005 Sanford was named a Top 40 Under 40 recipient in the Birmingham Business Journal.

This young professional said that she was very fortunate to have hands-on experience while studying at TROY. "The personal attention made it very easy to transition," Sanford said.

Sanford's involvement does not stop with her professional career. She is an active member in the community, as well. The alumnus is involved in Meals on Wheels, Women's Exchange, the Junior League of Birmingham and has been on the Gardendale Chamber of Commerce Board of Directors since 2005.

Sanford said that she was excited about being named a Distinguished Alumnus of the Year. "It's such a privilege. I am very proud to be a TROY graduate," she said.

The alumnus and her husband Kevin reside in Mount Olive, AL.

Mu Alpha Theta

From Wikipedia, the free encyclopedia

Mu Alpha Theta is a United States mathematics honor society. It has over 65,000 student members in more than 1,400 schools worldwide. Its main goals are to inspire keen interest in mathematics, develop strong scholarship in the subject, and promote the enjoyment of mathematics in high school and two year college students.

History

The Mu Alpha Theta National High School and Junior College Mathematics Club was founded in 1957 by Dr. Richard V. Andree and his wife, Josephine Andree, at the University of Oklahoma. In Andree's words, Mu Alpha Theta is "an organization dedicated to promoting scholarship in mathematics and establishing math as an integral part of high school and junior college education". The name Mu Alpha Theta was constructed from the Greek lettering for the phonemes m, a, and th.

The MAΘ logo is a visual proof of the Pythagorean theorem

Pi Mu Epsilon, the National Collegiate Honor Society of Mathematics, contributed funds for the organization's initial expenses; the University of Oklahoma provided space, clerical help and technical assistance. The Mathematical Association of America, a primary sponsor of the organization since 1958, and the National Council of Teachers of Mathematics nominated the first officers and Board of Governors. The Society for Industrial and Applied Mathematics became an official sponsor in 1998, followed by The American Mathematical Association of Two-Year Colleges in 2002.

The official journal of Mu Alpha Theta, *The Mathematical Log*, was first issued in 1957 on mimeograph and was in printed form starting in 1958. It was published four times during the school year until 2002 and featured articles, reports, news and problems for students.

Several different awards are given by Mu Alpha Theta, including the Kalin Award to outstanding students. Awards are also given to students who plan to become mathematics teachers. Chapters and chapter sponsors are also recognized by the Sister Scholastica and Huneke awards for most dedicated sponsors.

The first Mu Alpha Theta National Convention was held at the University of Pittsburgh in 1970. Each year the convention brings together hundreds of teachers and students from across the country for five days of math-related events. The 2005 Mu Alpha Theta was held in Honolulu, Hawaii, and was won by Vestavia Hills High School Math Team from Alabama. The 2006 Mu Alpha Theta was held in Fort Collins,

Help Save The Endangered

Pacific Northwest Tree Octopus

From Extinction!

About The Pacific Northwest Tree Octopus

The Pacific Northwest tree octopus (*Octopus paxarbolis*) can be found in the **temperate rainforests** of the Olympic Peninsula on the west coast of North America. Their habitat lies on the Eastern side of the Olympic mountain range, adjacent to Hood Canal. These solitary cephalopods reach an average size (measured from arm-tip to mantle-tip,) of 30-33 cm. Unlike most other cephalopods, tree octopuses are amphibious, spending only their early life and the period of their mating season in their ancestral aquatic environment. Because of the moistness of the rainforests and specialized skin adaptations, they are able to keep from becoming desiccated for prolonged periods of time, but given the chance they would prefer resting in pooled water.

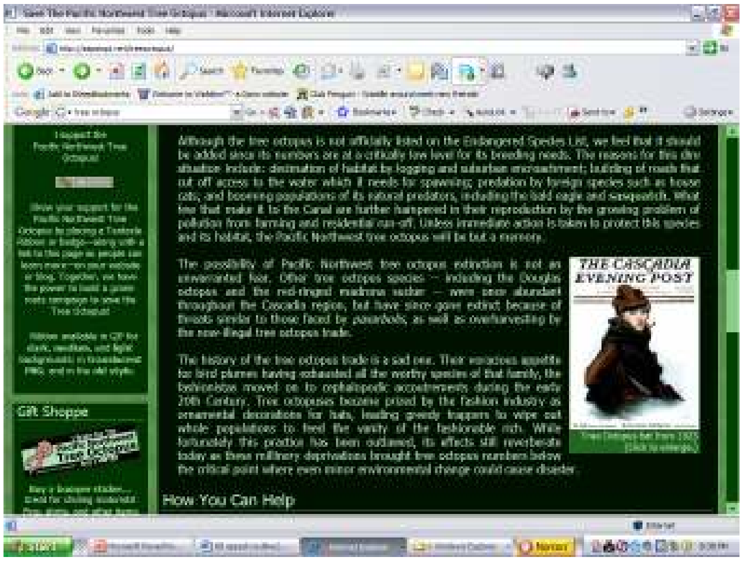
Rare photo of the elusive tree octopus

An intelligent and inquisitive being (it has the largest brain-to-body ratio for any mollusk), the tree octopus explores its arboreal world by both touch and sight. Adaptations its ancestors originally evolved in the three dimensional environment of the sea have been put to good use in the spatially complex maze of the **coniferous Olympic rainforests**. The challenges and richness of this environment (and the intimate way in which it interacts with it,) may account for the tree octopus's advanced behavioral development. (Some evolutionary theorists suppose that "arboreal adaptation" is what laid the groundwork in primates for the evolution of the

ephalopod News

007-01-09 Giant Squid tches Free Ride To The rquesas (Cruising orld)
n episode of underbody abotage attributed to one f the most mysterious

http://zapatopi.net/treeoctopus/



Although the tree octopus is not officially listed on the Endangered Species List, we feel that it should be added since its numbers are at a critically low level for its breeding needs. The reasons for this dire situation include: destruction of habitat by logging and suburban encroachment; building of roads that cut off access to the water which it needs for spawning; predation by foreign species such as house cats; and booming populations of its natural predators, including the bald eagle and sasquatch. What few that make it to the Canal are further hampered in their reproduction by the growing problem of pollution from farming and residential run-off. Unless immediate action is taken to protect this species and its habitat, the Pacific Northwest tree octopus will be but a memory.

The possibility of Pacific Northwest tree octopus extinction is not an unwarranted fear. Other tree octopus species -- including the Douglas octopus and the red-ringed madrona sucker -- were once abundant throughout the Cascadia region, but have since gone extinct because of threats similar to those faced by *paxarbolis*, as well as overharvesting by the now-illegal tree octopus trade.

The history of the tree octopus trade is a sad one. Their voracious appetite for bird plumes having exhausted all the worthy species of that family, the fashionistas moved on to cephalopodic accoutrements during the early 20th Century. Tree octopuses became prized by the fashion industry as ornamental decorations for hats, leading greedy trappers to wipe out whole populations to feed the vanity of the fashionable rich. While fortunately this practice has been outlawed, its effects still reverberate today as these millinery depredations brought tree octopus numbers below the critical point where even minor environmental change could cause disaster.

I. Information Literacy Quiz

How much do you know about information literacy? Take the following quiz to see if you are Somewhat Savvy (0-5 points), Moderately Savvy (6-10 points) or Downright Nerdy (10+ points)

1. List 4 major search engines and a major directory.

2. What is a blog?

3. Why might you use quotation marks when conducting a search?

4. URL is an acronym for..

5. Identify these Boolean search terms.

6. How do you find the owner or publisher of a Web site?

7. Identify these extensions and what they represent:

.org .com

.sch .k12

.edu .gov

.ac .net

.mil .ca

8. How do you find out who is linked to your school's Web site?

9. What clues in a Web address might indicate you are on a personal Web site?

10. [illegible]

11. How would you conduct a search for the following: a list of web sites of all the academic institutions in South Africa? (Hint: South Africa's country code is .za)

12. How do you find the history of any given Web site?

13. How would you conduct a search for the following: US higher education W [illegible]

14. How do sites get to the top of a result list in Google?

Added Frustrations

Tomorrow we start the MEAP tests. The students will be tested up to six hours a day for three weeks. The MEAP tests are stressful enough but the changes that have been implemented will make the tests even more stressful. I know by the time the third week of testing rolls around, the students will be brain-dead and totally worn out. But we will survive.
To add to the stress of the testing, we have been informed that there will be

Our questions for the author **AND HER ANSWERS** are here.

So, what did you think? Leave your feedback here.

Chapter 11&12 Themes

Throughout chapters 11&12 you find many themes that affect the plot of the novel in a large way. They help show what the characters are going through and the struggles they face, the daily struggle we all face in life.

One theme present in a large portion of the novel is the struggle for equal rights. There are many difficulties that Rosaleen, the three sisters, Zach and other blacks in the 60's face because of their color. Blacks were still looked at as the lesser minority, slaves to the white population (even after the Civil Rights Act), facing racism ever time they stepped out their door.

Another theme is love. Lily yearns to be loved in the story, not yet sure just where she belongs. She is not loved at her own house, so she heads to Tiburon to see of she can fill the empty gap. In Tiburon she meets the three sisters and Zach, four people who open Lily's eyes and show her people do care about her.

Then one of the main morals that is brought up over and over again is grief. Lily has a hard time dealing with her emotions and doesn't know how to handle them. She doesn't want to face the fact that she may have killed her mother and come to face the hardships of life. But, as a twelve year old girl who has never had much support, she needs guidance and advice from someone who will be there for her. Lily begins to see that she has these type of people now present in her life and begins to make the transformation from a child to a young adult.

Finally, as you read through the book other themes pop out at you more than others, some more signifigant than the rest, that help you to understand Lily and what she is going through. -
Posted by ChrissyT on 11/25/02; 3:33:29 PM from the Themes dept.

The Secret Life of Bees

We're Making the Reader Study Guide!

Questions for the Author

For more on the use of Weblogs in education, click here.

Previous topic: symbols for chapters 11 and 12 Next topic: Test1

Questions for the Author topic started 9/26/2002; 6:33:54 PM last post 3/5/2003; 12:27:27 PM

Don Ginty - **Questions for the Author**
9/26/2002; 6:33:54 PM (reads: 31056, responses: 2)

Dear Sue,

Here is what we would like to know:

1. Katie would like to know what personality traits of yours did Lily end up with?
2. Christina would like to know where did the bees idea came from?
3. Megan wants to know how autobiographical this story is?
Shawn would like to know how long did it take to write?
4. Tim is wondering about the symbolism of the river, and I'm wondering whether the numerous mentions of the moon were intended?
5. We all want to know who you would like to see playing the main roles in the movie?
6. Geoff is wondering why you included the interracial relationship between Lily and Zach?
7. Beth would like to know how much editing was done to the final version?
8. Some of us wonder if you thought about shortening the length of Lily's story?
9. Chrissie wants to know where you got the idea of the book from?
10. Is there a sequel?

Our questions for the author **AND HER ANSWERS** are here.

So, what did you think? Leave your feedback here.

Hey Joe,
What did you think about the news we talked about this morning?
What is with the zoo anyway? I wish Mona could go to the Sanctuary!! We
may have to write some more letters.
Love,
Ms Brown

Global SchoolNet Foundation

January 19, 2006

Communicate, Collaborate, & Celebrate Learning!

The original resource for global project-based learning, problem-based learning, and online collaborative learning.

This is hot!!! Global Warming Student Speakout!

Global SchoolNet and Google Education collaborated on the Global Warming Student Speakout! Results have been published in USA Today. Learn more!

Global SchoolNet Foundation (GSN), founded in 1984 by teachers who believed that in a connected world students need a global perspective, brings together youth online from 194 countries to explore community, cultural and scientific issues that prepare them for the workforce and help them to become responsible and literate global citizens. Global SchoolNet's free membership program provides project-based learning support materials, resources, activities, lessons and special offers from Global SchoolNet partners. Join today and collaborate with more than 90,000+ educators across 194 countries.

Mu Alpha Theta

From Wikipedia, the free encyclopedia

Mu Alpha Theta is a United States mathematics honor society. It has over 65,000 student members in more than 1,400 schools worldwide. Its main goals are to inspire keen interest in mathematics, develop strong scholarship in the subject, and promote the enjoyment of mathematics in high school and two year college students.

History

The Mu Alpha Theta National High School and Junior College Mathematics Club was founded in 1957 by Dr. Richard V. Andree and his wife, Josephine Andree, at the University of Oklahoma. In Andree's words, Mu Alpha Theta is "an organization dedicated to promoting scholarship in mathematics and establishing math as an integral part of high school and junior college education". The name Mu Alpha Theta was constructed from the Greek lettering for the phonemes m, a, and th.

Pi Mu Epsilon, the National Collegiate Honor Society of Mathematics, contributed funds for the organization's initial expenses; the University of Oklahoma provided space, clerical help and technical assistance. The Mathematical Association of America, a primary sponsor of the organization since 1958, and the National Council of Teachers of Mathematics nominated the first officers and Board of Governors. The Society for Industrial and Applied Mathematics became an official sponsor in 1998, followed by The American Mathematical Association of Two-Year Colleges in 2002.

The MAΘ logo is a visual proof of the Pythagorean theorem

The official journal of Mu Alpha Theta, *The Mathematical Log*, was first issued in 1957 on mimeograph and was in printed form starting in 1968. It was published four times during the school year until 2002 and featured articles, reports, news and problems for students.

Several different awards are given by Mu Alpha Theta, including the Kalin Award to outstanding students. Awards are also given to students who plan to become mathematics teachers. Chapters and chapter sponsors are also recognized by the Sister Scholastica and Huneke awards for most dedicated sponsors.

The first Mu Alpha Theta National Convention was held at the University of Pittsburgh in 1970. Each year the convention brings together hundreds of teachers and students from across the country for five days of math-related events. The 2005 Mu Alpha Theta was held in Honolulu, Hawaii, and was won by Vestavia Hills High School Math Team from Alabama. The 2006 Mu Alpha Theta was held in Fort Collins,

ATOMIC LEARNING

Click. See. Hear. Learn.

Atomic Learning provides software training using a unique just-in-time approach. Our library of thousands of short tutorials on dozens of applications are focused on answering the common questions anyone may have when learning software. We like to call them "atoms of learning" and they are easy to access whenever and where ever you need them. A subscription to Atomic Learning provides you access to all of the tutorials and other valuable educational resources.

Click here to learn more about Atomic Learning and find out how to get a **free trial account.**

(**Flash plugin** required.)

To view our "click and learn" tutorials, make sure you are using a recent browser and that you have version 6.0 or higher of Apple's FREE QuickTime plugin installed. **Info for Windows Users with QuickTime 7**

Click here for free tutorials!
